

**ABSTRACT****FLEXIBLE DRINKING STRAW**

The invention relates to flexible drinking straws that ~~are~~  
<sup>accompany</sup> ~~attached to~~ packed fruit juices, milks, coffees etc. and are  
bent to take up less space and to be handier, and concerns  
the changes that render straightening of the straw possible,  
5 which was impossible until now, and at the same time they  
offer the possibility of increasing the effective length of the  
straw.
